CREATIVE LED VIDEO TILE WITH 15MM PIXEL PITCH

SPEC SHEET

HIGHLIGHTS

- Wide range of pixel pitches to suit every application
- Easy cabling, mapping and configuration
- Bright and fully calibrated for optimal consistency

OVERVIEW

The VC-Grid 15 is a small, 240 x 240 mm RGB LED video module with a 15 mm pixel pitch. Useful in creating customized LED video solutions with maximum artistic flexibility and a minimum of effort, the VC-Grid's compact size makes it extremely suitable for integration into stage designs, set elements, creative ceilings, lobbies and much more. Used with or without a front diffuser, multiple VC-Grids can be combined in a countless variety of ways for ultimate design freedom. A combined power/data cable allows VC-Grids to be daisy-chained for easy setup and less cabling.

KEY MESSAGES

FLEXIBLE MOUNTING

The VC-Grid are lightweight and compact RGB LED modules, which can be arranged in many creative shapes combined with VC-Strip as well. The VC-Grid can be fastened to a surface or structure using pillar bolts or by using dedicated mounting frames for simplified and uniform installation. The VC-Grid comes in four different pixel pitch variants to cover a wide range of applications. Used with or without a front diffuser, multiple VC-Grids can be combined in a countless variety of ways for ultimate design freedom.

EASY INFRASTRUCTURE

The VC-Grid are daisy-chained with a hybrid power and data cable for easy installation. The VC-Grid can be controlled via the Martin P3 protocol for easy mapping and integration with other Martin LED Video products onto the same control system. For small or pure lighting applications, the VC-Grid also accepts RDM/DMX, enabling even more versatile use.

OPTIMAL PERFORMANCE

All VC-Grids feature advanced color & brightness calibration & color-matching even between different fixture types. The entire system is fully synchronized, ensuring all elements work cohesively without visible latency. The fixtures can be specified for noise sensitive applications as they are completely silent and the power supply can be mounted away from the fixtures.
